

The ultimate in rail sound realism.

Features:

- **Easy installation**
- **100% LOCOLINC compatibility**
- **Low cost . . . \$195.95**
- **Multiplexed sounds**
- **Remote volume control**
- **Small size: 1.25" x 2.75"**
- **No external battery required**
- **Automatic crossing signal**
- **Engine start-up and shut down**
- **Audio muting**

Diesel

- **8 throttle notches**
- **Independent engine RPM control**
- **Blow down**
- **Dynamic Braking**
- **Radiator fans, shutters**
- **Bell**
- **Horn**

Steam

- **Brake release**
- **Blowdown**
- **Chuff**
- **Cylinders**
- **Bell**
- **Whistle**

Keithco's newest product line, SOUNDLINC™, is here! These new sound systems offer unparalleled realism for diesel and steam locomotives. Sounds are multiplexed rail sounds from real railroads. Plus SOUNDLINC is 100% compatible with LOCOLINC®, giving you the convenience of managing all sound and control functions from one hand-held transmitter. This is undoubtedly the most comprehensive remote sound control of any system on the market. And like every Keithco product engineered for model railroaders, SOUNDLINC represents unsurpassed ease of use, functionality, and value. It's all about enjoying your hobby to the fullest.

SOUNDLINC sound systems are easy to install and measure a small 1.25" x 2.75" in size. They are designed to take full advantage of the control capabilities built into LOCOLINC transmitters. Other sound systems have only been able to utilize the bell and whistle buttons on LOCOLINC transmitters for real time sound. With SOUNDLINC you'll also have remote sound control at the touch of a finger. Increase the volume on locomotives in more

distant portions of the layout; decrease it when locomotives are near. And with SOUNDLINC there are no annoying pauses between bell, horn, or engine RPM output that plague other systems because of insufficient memory. You get all these sounds without delay or decrease in volume. Furthermore, with LOCOLINC in control, there's no need for external batteries.

All SOUNDLINC sound modules reflect the rich sounds of real locomotives. Multiplexed audio output assures no sound quality is lost. Full engine start-up and shut down, plus audio muting and automatic crossing signal come with every module. Diesel sound modules feature eight throttle notches, independent RPM control, blowdown, Dynamic Braking, fans, shutters, bell and horn. Steam modules include brake release, blow down, chuff, cylinders, bell and whistle.

Keithco's engineers are dedicated to bringing the highest standard of consumer electronics to the model railroad hobby. All SOUNDLINC and LOCOLINC products are original engineering designs employing state-of-the-art sound reproduction, microprocessor technology, and

electronic manufacturing processes. As a result of efficient engineering designs and advanced manufacturing, Keithco's model railroad electronics are also the most cost-effective products on the market.

SOUNDLINC represents great value – unsurpassed sound realism, 100% compatibility with LOCOLINC, and low cost. Call or write for more information on SOUNDLINC sound modules and LOCOLINC addressable radio control products for N-through-G scale layouts.

At introduction, these SOUNDLINC modules will be available. Others are under development. Please check with your dealer or visit our website for the most current listing of available modules.

DIESEL:

- KSL-DF7** EMD F7 locomotive
- KSL-DFA** ALCO FA locomotive
- KSL-DN2** NW2 locomotive
- KSL-D9** GP9 locomotive

STEAM:

- KSL-ST** Steam locomotives
